TOWER INTRODUCES ADVANCED TECHNOLOGY, ONE-STEP FOUNTAIN SOLUTION FOR SHEET-FED PRESSES

(Easton, PA) **Tower Products, Inc.**, a leading manufacturer of environmentally sensitive pressroom chemistry has released ***MILLENNIUM 1000***, an advanced technology, one-step fountain solution for use on high-speed sheet-fed presses.

MILLENNIUM 1000 does not require the use of alcohol or alcohol replacements even when used in difficult dampening systems. The product gives sheet-fed press operators increased latitude on press at maximum production speeds and eliminates the need for mixing two products for the fountain. More importantly, utilizing a unique wetting agent system, ***MILLENNIUM 1000*** can be used at a very low dosage (3-4 ounces per gallon) versus other one-step products running double the dosage. This innovation helps reduce the over-emulsification of the ink and is milder on dampening and pan rollers within the press. ***MILLENNIUM 1000*** also features an outstanding buffering system to prevent calcium carbonate from causing a pH drift and produces a fast, clean roll up, preventing excess paper waste.
