## **TOWER INTRODUCES MILLENNIUM 7000 - A ZERO VOC FOUNTAIN SOLUTION FOR SHEET-FED UV/EB PRINTING**

(Easton, PA) Tower Products, Inc., a leading manufacturer of environmentally sensitive pressroom chemistry has released *MILLENNIUM 7000*, an advanced, zero VOC fountain solution for use on high speed sheet-fed presses; and specifically for printers that are using UV/EB inks. The product is yet another Tower solution helping printers to comply with complex environmental issues in the greening of their pressroom.

*MILLENNIUM 7000*, when used in conjunction with the Tower's *AR-7500* (a high technology alcohol substitute that does not contain any HAPS or ethylene glycol ethers) gives sheet-fed press operators increased latitude on press at maximum production speeds. The product features an outstanding buffering system to prevent calcium carbonate from causing a pH drift and has the ability to give the pressman a much faster and cleaner roll up, preventing excess paper waste. Additionally, *MILLENNIUM 7000* was formulated to work with CTP plates to provide the sharpest possible dot. When used in the UV/EB process, the product does not interfere with drying and is the product of choice for printing on plastic and non-porous substrates.

*MILLENNIUM 7000 and AR-7500*, as well as, other Tower brand pressroom chemical products are only available through authorized Tower dealers. For more information, please contact Sue McGraw at 800.527.8626 or visit our website at [www.towerproducts.com](http://www.towerproducts.com).
