Professional Newspaper Washes

PRESS PRO

Premium, Water Miscible Newspaper Wash

For newspaper printers who demand the very best, **Press Pro** is the finest water miscible wash we make. **Press Pro** contains a unique package of high technology cleaning agents, conditioners and deglazing compounds for thorough, deep cleaning action. The product can be used straight or mixed with up to 50% water for maximum economy and VOC reductions.

I.P. WASH

Economy, Water Miscible Newspaper Wash

"A premium product at an economical price" gives the best description of **I.P. Wash**. This highly effective, water miscible wash will quickly remove ink and varnish with a light, pleasant odor and plenty of cleaning punch. It can be mixed with water up to 30% for more cleaning economy.

Pressroom Specialties

RESTORKLEEN

Deglazer-Rejuvenator-Conditioner for Rollers and Blankets

Restorkleen is a true, one-step deglazer, rejuvenator and conditioner. It not only strips glaze, but also restores plasticizers to rubber surfaces to condition and prevent dehydration. A once-a-day application of this easy-to-use liquid is all you need to keep rollers and blankets velvety-smooth.

Newspaper Fountain Solutions

PREMIER NEUTRAL

World Class, Neutral Fountain Solution

Meeting the requirements of today's demanding newspaper and commercial cold web printer, **PREMIER NEUTRAL** is the state of the art in neutral fountain solutions. The product's unique wetting agent package promotes lower ink emulsification, which results in bolder solids and brilliant colors. This is the best printing neutral on the market for sharpness and perfect dot reproduction. **PREMIER NEUTRAL** is the ultimate technology for spray bar systems, since the product's dual biocide system continually cleans the dampening system. Product dosage: two ounces per gallon. Conductivity Range: 1000-1100 micromhos plus water.

PREMIER NEUTRAL ND

Advanced Technology, Neutral Fountain Solution

PREMIER NEUTRAL ND was formulated to give fast roll-ups and reduce paper waste for newspaper operations. The product's special formula allows for the solution to more quickly emulsify the ink, with greater stability, in order to get saleable quantities of newspapers off the press fast. **PREMIER NEUTRAL ND** is also a terrific product for newspapers running multiple editions since it cleans up extremely fast on "hot starts". This is a great product for CTP plates as the wetting agents enhance the print quality and dot reproduction. **PREMIER NEUTRAL ND** also has a dual biocide system to make sure spray bars stay clean and require less maintenance. Product dosage: two ounces per gallon. Conductivity Range: 1425-1525 micromhos plus water.

PREMIER NEWS MA **NEW!**

High Technology, Mild Acid Fountain Solution

With the increasing color and print quality demands of advertisers, newspaper and cold web commercial printers have been looking for a way to produce higher quality lithographic printing. **PREMIER NEWS MA** was formulated for this purpose. Combining the use of commercial acid fountain solution technology with our neutral technology, we have developed a product that reduces start up waste and prints a sharp and brilliant dot. A new wetting agent package makes running CTP plates easy and the ability of the product to work with high strength ink systems is outstanding. Product dosage: two to three ounces per gallon. Working pH: 5.0-5.5. Conductivity Range: 1100-1650 microhmos plus water.

Low VOC Washes

LÖ-VÖ WASH E-200

One-Step Low VOC Wash

Formulated to meet the needs of newspapers who are attempting to reduce VOCs. **LÖ-VÖ WASH E-200** represents an easy, one-step method of cleaning. **LÖ-VÖ WASH E-200** contains less than 4 pounds per gallon of VOCs and can be mixed with water up to 50% to further reduce emissions.

LÖ-VÖ WASH 50

Advanced Low VOC Wash

LÖ-VÖ WASH 50 contains less than 3.5 pounds per gallon of VOCs and can be mixed with water up to 50% to further reduce emissions. This product contains no reportable hazardous ingredients, has a flashpoint over 140 °F and has a very mild odor.

LÖ-VÖ WASH ZERO

Zero VOC Wash

LÖ-VÖ WASH ZERO was formulated to offer large newspaper printers an efficient ink cleaning compound without VOCs and hazardous ingredients. **LÖ-VÖ WASH ZERO** offers superb cleaning action and has a flashpoint of over 200 °F. This product is designed to be mixed with 50% water and has virtually no odor!
