CALIFORNIA PROPOSITION 65 STATEMENT

The main focus of California's Proposition 65 is to advise consumers of hazards in products they may use. Products used by industry have very specific and detailed warnings mandated by several government regulations. These warnings meet and exceed California's Proposition 65 regulations.

All of Tower Products, Inc.'s pressroom chemicals that are used in the state of California are intended for industrial use only. Per 27 CCR § 25606, "A warning to an exposed employee about a listed chemical meets the requirements of this subarticle if it fully complies with all warning, information, training, and labeling requirements of the federal Hazard Communication Standard." Tower Products, Inc.'s chemical products are all compliant with the requirements of the federal Hazard Communication Standard, and are therefore compliant with the clear and reasonable warning requirements of California's Proposition 65.
