## **TOWER PRODUCTS EARNS FOGRA APPROVAL FOR MILLENNIUM 5000 ADVANCED TECHNOLOGY FOUNTAIN SOLUTION**

(Easton, PA) Tower Products, Inc., a leading manufacturer of environmentally sensitive pressroom chemistry has obtained a FOGRA Approval for *MILLENNIUM 5000*, an advanced one step fountain solution for use on high speed sheet-fed presses. This product is yet another Tower technology solution helping printers produce outstanding work for their customers, while complying with press manufacturers stringent directives.

*MILLENNIUM 5000*, unlike other FOGRA Approved fountain solutions, was formulated with North American market production dynamics in mind. It is a single step product that can be used on presses running up to 18,000 impressions per hour and it performs well with both paper and non-porous substrates. The product features an outstanding higher pH buffering system and has the ability to give the pressman a much faster and cleaner roll up, preventing excess substrate waste. When used in the HUV, LED UV environment, the solution does not interfere with drying.

*MILLENNIUM 5000*, as well as other Tower pressroom chemical products, are only available through authorized Tower dealers. For more information, please contact Sue McGraw at 800.527.8626 or visit our website at [www.towerproducts.com](http://www.towerproducts.com).
